

### **REMARKS**

Reconsideration of this application is respectfully requested in view of the foregoing amendment and the following remarks.

By the foregoing amendment, claims 1, 6, 9, and 14 have been amended, and claims 17-23 have been added. Thus, claims 1-23 are currently pending in the application and subject to examination.

In the Office Action mailed January 20, 2006, the Examiner objected to claims 6 and 14 as depending from a rejected base claim, but stated that they would be allowable if rewritten in independent form. Claims 6 and 14 have been rewritten in independent form, including the limitations of the claims from which they depend, as suggested by the Examiner. The Applicants submit that claims 6 and 14 are allowable, for at least this reason. Therefore, Applicants respectfully request a withdrawal of the objection to claims 6 and 14.

The Examiner rejected claims 1-5, 7-13, and 15-16 under 35 U.S.C. § 102(e) as being anticipated by U.S. Patent No. 6,047,327 to Tso et al. ("Tso").

It is noted that claims 1 and 9 have been amended. To the extent that the rejections remain applicable to the claims currently pending, the Applicants hereby traverse the rejection, as follows.

Amended claims 1 and 9 recite in part an e-mail sending and receiving system where each e-mail is written on a web page provided by a communications center, the system comprising a positional data attaching section for attaching one or more of the physical positional data corresponding to the receipt of a selected location at the web page, wherein the location is stored in the positional data storage section to the e-mail

message generated by the mail generating section; and an e-mail data receiving location hosting the web page, wherein at least one of an address of the desired addressee, e-mail text, and a desired location is received.

The Applicants submit that Tso does not describe or suggest at least the limitations of a system where the selection of physical positional data is received at a web page, as claimed in amended claims 1 and 9.

Tso teaches a server automatically distributing electronic information to a targeted group of users, depending on information contained in the profile of the receiver. (See column 1 lines 48-50 and column 2 lines 40-43). Tso does not teach the receipt of information at a web page, which is used to attach location information to an e-mail message.

In addition, the Applicants submit that Tso does not teach at least the limitations of an e-mail data receiving location hosting the web page, wherein at least one of an address of the desired addressee, e-mail text, and a desired location is received, as claimed in amended claims 1 and 9.

For at least these reasons, the Applicants submit that claims 1 and 9, as amended, are allowable over the cited prior art. As claims 1 and 9 are allowable, the Applicants submit that claims 2-8 and 10-19, which depend from allowable claims 1 and 9, are likewise allowable.

Claims 20-23 contain similar limitations to those described above, and the Applicants submit that claims 20-23 also distinguish the cited art. Therefore, the Applicants respectfully request allowance of claims 1-23.

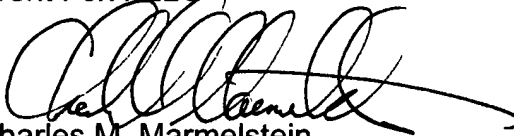

**CONCLUSION**

For all of the above reasons, it is respectfully submitted that the claims now pending patentability distinguish the present invention from the cited references. Accordingly, reconsideration and withdrawal of the outstanding rejections and an issuance of a Notice of Allowance are earnestly solicited.

Should the Examiner determine that any further action is necessary to place this application into better form, the Examiner is encouraged to telephone the undersigned representative at the number listed below.

In the event this paper is not considered to be timely filed, the Applicants hereby petition for an appropriate extension of time. The fee for this extension may be charged to our Deposit Account No. 01-2300. The Commissioner is hereby authorized to charge any fee deficiency or credit any overpayment associated with this communication to Deposit Account No. 01-2300, referencing Attorney Docket No. 107439-00027.

Respectfully submitted,  
Arent Fox PLLC
